PROFESSIONAL SUMMARY

Senior Full-Stack & AI Systems Engineer with 10+ years of experience designing scalable backend systems, cloud-native applications, AI-powered platforms, and distributed software solutions across fintech, SaaS, e-commerce, logistics, edtech, and enterprise systems.

Specialized in building high-performance APIs, payment infrastructure, marketplace platforms, and production-ready Generative AI applications using Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), AI Agents, and modern machine learning frameworks. Experienced across Python, Java, TypeScript, NestJS, Django, Spring Boot, Laravel, React, Next.js, AWS, PostgreSQL, GraphQL, and cloud-native architectures.

Proven record of leading engineering teams, architecting complex systems, mentoring developers, and delivering secure, scalable software from concept through production. Passionate about applying AI to solve real-world business problems while maintaining engineering excellence, performance, and reliability.

PROFESSIONAL EXPERIENCE

Backend Engineer & AI Engineer

Taskify360 (Remote, Part-time) | Texas, USA
Apr 2026 – Present

Architected and developed a scalable marketplace platform featuring payment processing, digital wallets, and financial transaction management.

Designed and implemented high-performance backend services using Bun, TypeScript, Drizzle ORM, and PostgreSQL.

Built an AI-powered customer support assistant using Large Language Models (LLMs), reducing customer support workload by approximately 25%.

Developed secure REST APIs with a focus on maintainability, scalability, and clean architecture.

Collaborated with frontend engineers to define API contracts and streamline feature delivery.

Mentored engineers through architecture reviews, code reviews, and backend engineering best practices.

Contributed to deployment automation, monitoring, and overall platform reliability.

Technologies: Bun, TypeScript, Drizzle ORM, PostgreSQL, REST APIs, Docker, AI, LLMs, Git

Senior Backend Engineer

Blip.ng (Remote, Part-time) | Abuja, Nigeria
Nov 2024 – Present

Led backend development for a transportation platform supporting ride-hailing, payments, and wallet infrastructure.

Engineered a high-throughput wallet and payment system processing over **₦109 million** in monthly transactions.

Designed scalable REST APIs supporting bookings, user management, payments, and financial reconciliation.

Integrated AI-assisted customer support capabilities that significantly reduced manual support requests.

Improved API performance and database efficiency through query optimization and scalable service design.

Collaborated with cross-functional teams to deliver production-ready backend services.

Mentored developers through technical guidance, code reviews, and architectural recommendations.

Technologies: NestJS, TypeScript, PostgreSQL, TypeORM, Redis, REST APIs, Docker, AI

Full-Stack Software Engineer

Nexoris Technologies | Abuja, Nigeria
Aug 2025 – Nov 2025

Developed enterprise software solutions including a Learning Management System (LMS), online examination platform, and business management applications.

Designed backend APIs using NestJS with secure authentication, authorization, and role-based access control.

Built responsive frontend interfaces using React and Next.js.

Implemented the company's corporate website and landing pages, improving digital presence and usability.

Integrated AI-powered customer assistance features to improve user engagement and operational efficiency.

Worked closely with product stakeholders to translate business requirements into scalable technical solutions.

Technologies: NestJS, React, Next.js, PostgreSQL, TypeScript, REST APIs

Machine Learning & AI Engineer

Reviai.ai | Abuja, Nigeria
Feb 2025 – Aug 2025

Fine-tuned Large Language Models (LLMs) for real estate applications, improving response quality and domain-specific accuracy by approximately 15%.

Designed and implemented a Retrieval-Augmented Generation (RAG) architecture for real-time knowledge retrieval and AI-assisted search.

Developed AI-powered web crawlers and automated data collection pipelines, significantly reducing manual data preparation.

Deployed production-ready AI models on AWS SageMaker and integrated them with Django backend services.

Designed scalable REST APIs supporting AI inference, document retrieval, and model interactions.

Collaborated with engineering teams to deploy secure, production-ready AI services.

Conducted architecture reviews and mentored developers on AI engineering best practices.

Technologies: Python, Django, AWS SageMaker, Hugging Face, Transformers, RAG, LangChain, PostgreSQL, REST APIs

Full-Stack Software Engineer

Management System Global | Abuja, Nigeria
Aug 2024 – Feb 2025

Built enterprise web applications using React, Next.js, and Laravel for clients across multiple industries.

Developed features including payment processing, digital wallets, training systems, examination modules, and business workflows.

Designed reusable frontend components and optimized application performance for improved user experience.

Collaborated with backend engineers to deliver scalable RESTful APIs and seamless frontend integration.

Performed code reviews and contributed to engineering quality standards across development teams.

Technologies: React, Next.js, Laravel, PHP, JavaScript, MySQL, REST APIs

Full-Stack Software Engineer

Orion Industrial Resources Ltd | Abuja, Nigeria

Feb 2024 – Aug 2024

Developed modern web applications using React, Vite, Express.js, and TypeScript. Implemented interactive 3D visualization features using Babylon.js for industrial applications.

Built scalable backend APIs supporting business operations and client workflows.

Collaborated with mobile engineers to ensure consistent API integration across platforms.

Reviewed pull requests, improved code quality, and supported junior developers through technical mentorship.

Technologies: React, Vite, Express.js, TypeScript, Babylon.js, PostgreSQL

Lead Full-Stack Software Engineer

Walkre.com (Part-time) | Abuja, Nigeria

Jan 2023 – Present

Lead the end-to-end architecture, design, and development of **Walkre**, a trust-first e-commerce and marketplace platform built to improve secure online commerce.

Architected scalable backend services using **Spring Boot (Java)**, designing RESTful APIs for authentication, marketplace operations, payments, order management, inventory, messaging, and user management.

Designed and implemented a modern frontend using **Next.js**, **React**, and **Redux**, delivering a responsive, high-performance user experience.

Engineered secure payment workflows, marketplace infrastructure, and scalable data models supporting buyers, sellers, and administrators.

Integrated GraphQL and REST APIs to support efficient communication between frontend and backend services.

Led technical decision-making, system architecture, code quality initiatives, and development planning throughout the product lifecycle.

Collaborated closely with product stakeholders to transform business requirements into scalable technical solutions.

Established engineering standards, reviewed pull requests, mentored developers, and promoted clean architecture and software engineering best practices.

Technologies: Java, Spring Boot, React, Next.js, Redux, GraphQL, REST APIs, PostgreSQL, Docker, Git

Full-Stack Software Engineer

Swifre.com | Abuja, Nigeria

Sep 2023 – Nov 2023

Contributed to the development of a community-driven blogging and publishing platform enabling user-generated content and social engagement.

Developed backend APIs and frontend features supporting user authentication, content publishing, comments, notifications, and profile management.

Implemented GraphQL services to improve frontend data retrieval efficiency and reduce unnecessary API requests.

Collaborated with designers and backend engineers to deliver responsive, user-friendly experiences across web platforms.

Improved application maintainability through reusable components and modular architecture.

Technologies: Laravel, PHP, React, JavaScript, GraphQL, MySQL

Backend & Mobile Software Engineer

Amabills Technologies | Abuja, Nigeria

Mar 2023 – Nov 2023

Developed enterprise SaaS solutions for multiple clients using Laravel, GraphQL, React, React Native, and Next.js.

Designed scalable backend APIs using **Laravel** and **Lighthouse GraphQL**, enabling efficient communication across web and mobile applications.

Helped build a sophisticated **multi-tenant enterprise platform** supporting accounting, inventory management, production tracking, staff management, messaging, sales, work scheduling, and payment processing.

Collaborated with mobile engineers to build cross-platform applications using React Native while simultaneously developing administration dashboards with Next.js.

Improved application scalability through modular backend architecture and reusable API services.

Participated in architectural discussions, code reviews, and engineering planning across multiple client projects.

Technologies: Laravel, PHP, Lighthouse GraphQL, React, React Native, Next.js, MySQL

Software Engineering Instructor & Software Engineer

EL Academy | Abuja, Nigeria

Feb 2022 – Feb 2023

Delivered practical software engineering training covering **Python, PHP, Laravel, Django**, cybersecurity, networking, and software development best practices.

Designed structured learning programs that enabled students to build real-world web applications using modern development frameworks.

Mentored aspiring software developers through hands-on coding sessions, project reviews, debugging, and career guidance.

Led development of secure client web applications while promoting secure coding practices and application security.

Contributed to organizational planning, technical decision-making, and digital transformation initiatives.

Technologies: Python, Django, PHP, Laravel, JavaScript, MySQL

Wallet Operations & Customer Support Specialist

Recharge And Get Paid DRC | Abuja, Nigeria

Mar 2019 – Dec 2021

Managed secure digital wallet funding operations and payment verification for a large-scale financial services platform.

Verified customer payment transactions, reducing fraud risk and maintaining transaction accuracy.

Junior Software Developer

Walker Nigeria | Abuja, Nigeria

Jan 2016 – Jan 2021

Developed web applications supporting hotel reservations, flight bookings, tourism services, and vehicle rental operations.

Built backend functionality using PHP and Laravel while developing responsive frontend interfaces with HTML, CSS, JavaScript, and Blade.

Technologies: PHP, Laravel, JavaScript, HTML, CSS, MySQL

SELECTED PROJECTS

Reviai: Fine-tuned LLM and RAG architecture for real estate intelligence and automated data collection.

AI Support Assistant: Conversational AI utilizing tool calling and context-aware reasoning to automate support.

MarketMind AI: Financial analysis platform providing intelligent market insights using ML and LLM reasoning.

Walkre AI: Production AI assistant with conversational memory and external API integration for business automation.

Walkre: Trust-first e-commerce marketplace with digital wallets, secure payments, and inventory management.

Blip: Transportation platform featuring ride booking, wallet infrastructure, and high-volume payment processing.

Nexoris: Enterprise platform integrating an LMS, examination portal, and employee management solutions.

360 Corporation: Multi-tenant ERP supporting accounting, staff management, and real-time production tracking.

EDUCATION

Federal University of Technology Owerri (FUTO)

Bachelor of Technology (B.Tech.)

Environmental Engineering Technology

2011 – 2016

PROFESSIONAL DEVELOPMENT

Andela AI Engineering Bootcamp

AI Engineering Fellow
2026

Completed an intensive AI Engineering Bootcamp focused on building production-ready Generative AI applications.

Built AI-powered applications using Large Language Models (LLMs), OpenAI APIs, LangChain, Hugging Face Transformers, and Gradio.

Developed Retrieval-Augmented Generation (RAG) systems using vector databases and semantic search.

Designed AI agents with tool calling, structured outputs, memory management, and multi-step reasoning workflows.

Applied prompt engineering, model evaluation, and QLoRA fine-tuning techniques to optimize model performance.

Collaborated on hands-on AI engineering projects using Git workflows, peer reviews, and modern deployment practices.

CERTIFICATIONS

Andela AI Engineering Bootcamp – AI Engineering Fellow (2026)

Udemy AI Engineer Professional Tracks (Production AI, Agentic AI, Core LLM Engineering)

AI Leader: Generative AI & Agentic AI

Zero to Mastery – Complete AI & Machine Learning Bootcamp

PyTorch Deep Learning Bootcamp

TensorFlow Developer Bootcamp

HackerRank Software Engineer Certificate

HackerRank React

HackerRank JavaScript

HackerRank REST API

HackerRank Python

Certified Python Programming Instructor – EL Academy

Certified Cybersecurity Instructor – EL Academy

TECHNICAL SKILLS

Programming Languages

Python • Java • TypeScript • JavaScript • PHP • Rust • SQL • C#

AI & Machine Learning

Large Language Models (LLMs)
Generative AI
AI Agents
Prompt Engineering
LangChain
LangGraph
Hugging Face Transformers
OpenAI API
Retrieval-Augmented Generation (RAG)
MCP (Model Context Protocol)
Fine-tuning (QLoRA, PEFT)
PyTorch
TensorFlow
Scikit-learn
Vector Databases
Semantic Search
AI Evaluation
Gradio

Backend

Spring Boot • Django • NestJS • Laravel • Express.js • GraphQL • REST • gRPC

Frontend

React • Next.js • React Native • Redux Toolkit • Material UI • Tailwind CSS

Cloud & DevOps

AWS • Google Cloud Platform • Docker • Linux • GitHub Actions • CI/CD • Nginx

Databases

PostgreSQL • MySQL • Redis • Drizzle ORM • Prisma • Sequelize • TypeORM

Engineering

System Design • Software Architecture • Distributed Systems • Microservices • API Design • Performance Optimization • Technical Leadership • Agile • Test-Driven Development

Leadership & Architecture

Software Architecture • Technical Leadership • System Design • Code Reviews • Mentorship • Agile • Performance Optimization • TDD • Microservices
